

SPECIAL AWARD: Fast track your future with the AVL Tech'n'Drive Challenge

Solve one of our technical tasks and set your fastest time on the AVL driver simulator to win an internship and a goodie box.	
 Location	AVL Booth – 25/26
 Date	Tuesday, 22nd of July
 Time	between 9 AM and 4 PM
<div>How to take part?</div> <div><div><div>1. Reserve your spot in a technical challenge of your choice</div><div>2. Come to the AVL booth at your designated spot time & register in our portal</div><div>3. Solve the technical challenge</div><div>4. Clock in the fastest time on our AVL Racetech Driver Simulator</div><div>5. Win an internship, a beach chair and a goodie box</div></div><div></div></div>	
Technical Challenges	<p>Vehicle DNA: The driveability calibration of a vehicle defines the vehicle brand-specific DNA. Nevertheless, the calibrators must balance the trade-off between fuel or electric consumption and the pleasure of driving (Fun to Drive). This challenge addresses key calibration challenges in the context of vehicle drivability. Each question targets a fundamental understanding of how calibration influences both the subjective feel and objective behavior of modern electrified vehicles.</p> <p>Battery & Charging – Business Development: In this challenge, your task is to think like an engineer, strategist, and analyst – all at once. It’s about a high-performance use case you might not expect. You’ll need to break down a seemingly simple question into manageable parts, make logical assumptions, and come up with a clear and structured estimation – no tools, just your brain. Creativity counts just as much as realism.</p> <p>AI Pit Stop: Ready for the Perfect Flow: This challenge will put your creativity and problem-solving mindset to the test. Imagine AI not just as a tool, but as a co-pilot in a high-speed scenario where precision, structure, and a touch of innovation make all the difference. You’ll need to think fast, connect the dots, and visually map out how intelligence can become intuitive. Don’t worry – it’s not about knowing everything. It’s about how you approach the unknown.</p>
Winner	The three winners who solved the tasks the best and performed the fastest in the simulator will be announced on Wednesday, July 23 at the campsite (award ceremony).

Looking forward to seeing you back at the racetrack in Spielberg! 🏁🏎️
